

# 1. Sketch-Copy a Website

1) URL: [stockx.com](https://stockx.com)

2) Desktop

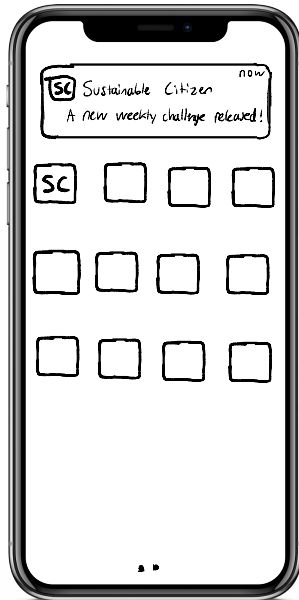

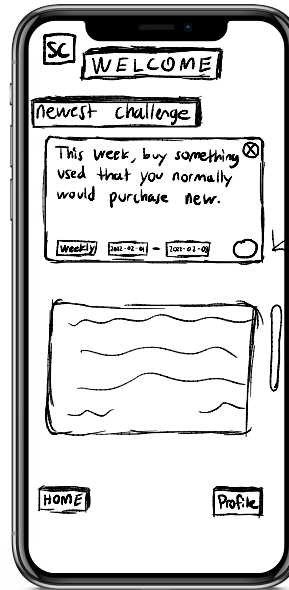

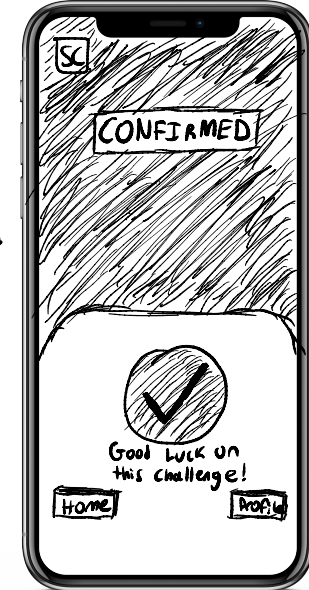

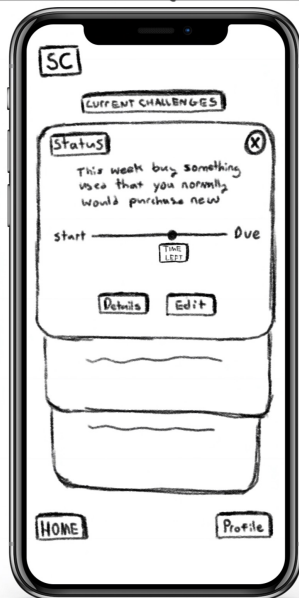

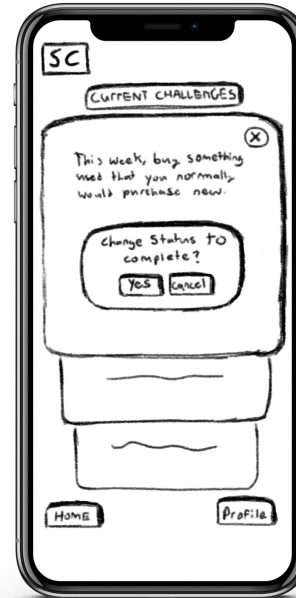

3) Chose this website because it has all the aspects that popular websites have and the common popular functionality that modern websites come with

Important button however as to what the button will be doing can be decided later on

The middle featured was made more in detail because this section serves as an eye catcher in order to keep users on the website

The bottom items are less important because they aren't supposed to be the highlight of the homepage

step: App notif that new challenge has releasedstep: Open the app to read new challengestep: Do challenge and signal app intention to do sostep: User completes the challenge over the following weeksstep: User records in the app that they completed the challenge

step: \_\_\_\_\_
